## STATEMENT

### ADVANCES IN NUTRITION

#### A GROWING IMPACT WHERE IT COUNTS

Innovative content, impact, and a publication schedule that keeps pace with the ever-growing demand for the latest nutrition knowledge—*Advances in Nutrition (AN)* has already become a trusted resource among scholarly publications in the field of nutrition.

Launched in 2010, *Advances in Nutrition* responds to the growing demand for a high-quality review journal that gathers, synthesizes, and explains the current state of knowledge in all facets of the field. *AN* publishes literature reviews focused on key findings and recent research in all areas of interest biomedical

researchers, clinicians, epidemiologists, public health and allied health professionals, and academicians. Review articles focus on progress made during the past few years rather

than research developments over a broad, historical timeframe.

#### High impact from the first.

- In its very first year eligible (2012), *AN* earned an Impact Factor of 3.245 from the *Journal of Citation Reports (JCR)*—meaning its articles were immediately considered among the most influential in the field.
- *AN*'s current (2016) Impact Factor of 5.233 places it seventh among all journals in the nutrition and dietetics category and in the top 6% among all the 11,365 journals in the Journal Citation Reports.

**Recognized excellence.** The Association for Learned and Professional Scholarly Publishers (ALPSP), selected *Advances in Nutrition* as one of three finalists for Best New Journal 2013. Among other criteria, the judges considered editorial scope, placement of the new journal within the publisher's portfolio of journals, and the contribution of the journal to the scientific literature.

## READY WHEN IT MATTERS

WITH A RAPID SUBMISSION-TO-PUBLICATION SCHEDULE,  
AN IS QUICKLY BECOMING THE FIRST PLACE TO TURN FOR THE MOST CURRENT, RELIABLE  
INFORMATION ON ALL FACETS OF THE NUTRITION FIELD.

### Global coverage, global impact.

- Over half of the authors of articles published in *Advances in Nutrition* come from institutions outside the United States, including institutions in Europe, Asia, the Middle East, South and Central America, and 55% of the online readership comes from outside North America.

*“As the field of nutrition is moving rapidly with an increasingly large body of literature, it is critical to have excellent up-to-date reviews and commentaries for scientists to keep pace. Advances in Nutrition has the unique role of publishing high quality reviews and allowing more complex assessments of the evidence, from cell and molecular work to animal models to population studies. By publishing reviews that consider multiple levels of evidence, AN provides a special opportunity to explain and interpret recent research findings to help clarify differences and limitations, and to increase the intellectual exchange and commentary in the field of nutrition.”*
